Metabolomics for methane mitigation – a case study in biserrula (*Biserrula pelecinus* L.)

Ghamkhar, K., Rochfort, S., Banik, B., Revell, C.

Methanogenic profile of biserrula and control species
Metabolomics of high and low methane Biserrula

PCA of LCMS data in the extreme high and low methane output accessions of biserrula and their geographic origin
Metabolic comparison of extreme methanogens

T-test analysis of negative LCMS data for high (4) and low (8) methane output accessions
